SOLUZIONE
Mixture of low volatility solvents to dilute waterborne systems

5 Lt

NMP free
ECO FRIENDLY

DESCRIPTION
Mixture of coalescences with graduated evaporation to be added to waterborne products to increase their open time and improve their workability. Recommended especially for hotter periods of the year and for making more demanding jobs easier to carry out.

TECHNICAL DATA CHEMICAL-PHYSICAL CHARACTERISTICS at 20°C (indicative values not constituting product specifications):	
Dilution	5-10%
Standard packaging (Lt)	2x5

APPLICATION
Dilute the finish with a quantity of between 5 and 10% of SOLUZIONE and apply as usual. In the case of two component products, mix the two components together before diluting. If higher quantities of thinner are added, the coverage quality of the finish could be affected and the interval before any necessary sanding operations could be increased.

NOTES
THE ADDITION OF THIS PRODUCT TO SYSTEMS SUBJECT TO EC Dir.2004/42 COULD RAISE THE VOC VALUE ABOVE THE PERMITTED LIMITS: CHECK THE MAXIMUM QUANTITIES TOLERATED.
In cold weather, the addition of SOLUZIONE to satin or matt products may slow down the floating of the opacifying substances.
Store above freezing.
